

Stop Hiring on Paper.

Real tasks. Real skills. Real decisions.

DEVELOPER RECRUITMENT · 5-MIN PITCH

Made with GAMMA

The CV Problem

CVs Lie

Paper credentials $\neq$ real skills

Time Wasted

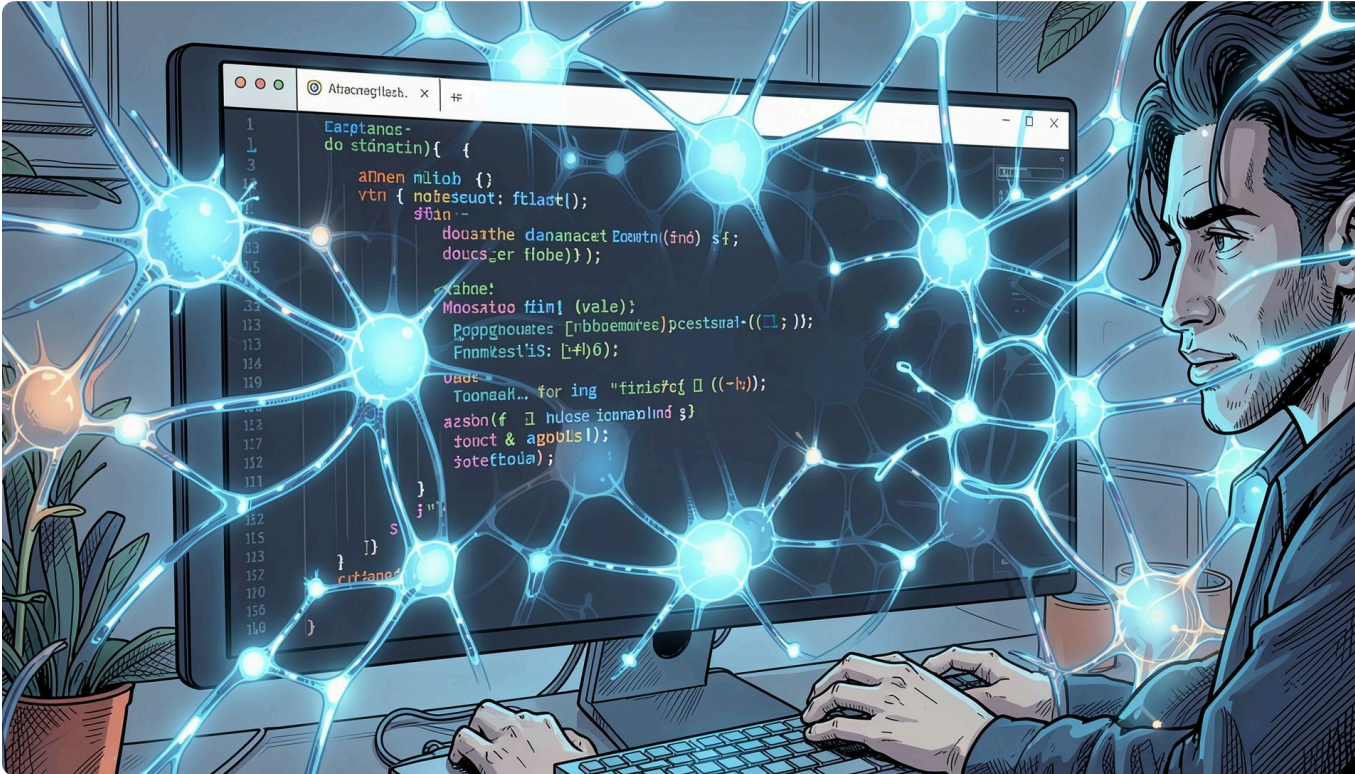

Hours reviewing the wrong candidates

Wrong Fit

No insight into actual job performance

Our Solution

AI-Generated Practical Tasks

Candidates solve **company-specific challenges** built from real work — not generic quizzes.

Real company context

AI-generated per role

No CV required

How We Evaluate

Prompt Efficiency

How fast and precisely candidates use AI

Solution Quality

Live skills, clean code, working output

Experience & Fit

Job requirements, projects, certifications

Education & Skills

Background, skills, and credentials

Two Views. One Platform.

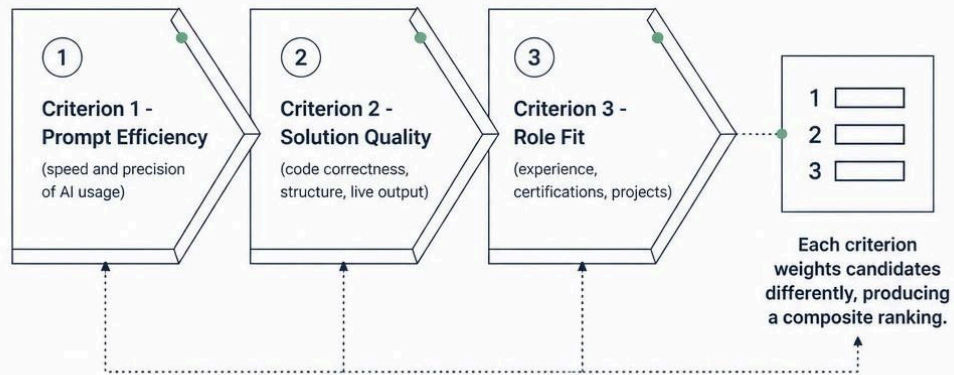

Employer UI

- Create & publish tasks
- Review ranked candidates
- Compare scores side-by-side

Candidate UI

- Receive company-specific task
- Solve with AI assistance
- Submit live solution

Prompt Engineering Test Case

Different Criteria → Different Results

Our test case shows how **adjusting judgment weights** surfaces different candidates — giving employers full control.

Ranking is transparent and adjustable per role.

The Impact

Better Hires

Skills-first, not resume-first

Faster Process

AI-generated tasks in minutes

Objective Ranking

Data-driven, bias-reduced decisions

Hire Smarter.

Real tasks. Real skills. Real hires.
